## Product discontinuation FlexOpto

### Göppingen, 30.03.2022 – FlexOpto no longer available!

Dear customers and interested parties,

the bidirectional media converter FlexOpto is unfortunately no longer available with immediate effect. With this tool it was possible to transmit FlexRay, CAN-HS or LIN signals over long distances (up to 100 m).

Due to the current component availability on the strained part market, the production is discontinued. All stocks are now completely sold out.

We would like to thank all customers for using this product for many years.
