FL3X Config SDK 1.8 – available now.

Goepfingen, 14.02.2025 – FL3X Config SDK 1.8: New hardware support.

FL3X Config SDK enables easy integration of the .NET library into your Windows application. Bus and network data can be interpreted directly from the database. Raw data is automatically converted into physical values, opening up new possibilities.

The latest version of the C# library offers a wider range of features and integrations to provide developers with an even more comprehensive tool.

FL3X Config SDK 1.8 supports the latest CAN-FD SIC hardware with data rates up to 5Mbit/s in complex networks and on request 8Mbit/s for P2P connections.

In addition, the supported HW platforms have been expanded so that the “FL3X System-XS” and the “FL3X System-XS2” can be used as an interface.

Further information is available on our website.
